Conor-Hinchee

Profile

Senior software engineer with 5+ years building ecommerce applications in React, GraphQL and TypeScript. Owns the GA4 analytics code and leads AI adoption on the frontend team at Express, a storefront with about 5 million monthly users. Comfortable reading, writing and reviewing code in unfamiliar codebases.

Skills

Frontend	React, TypeScript, JavaScript, Tailwind CSS, Vite, Webpack, Storybook
APIs	GraphQL, Apollo Client, Apollo Server, Node.js, REST
Testing	Jest, React Testing Library, Playwright, test-driven development
Ops & AI	GA4, data layer, TrackJS, Google Cloud Logging, Claude Code, MCP servers

Work Experience

Dec 2025 – Present — **Senior Ecommerce UI Engineer**, *Express*, Columbus, Ohio

- Lead AI adoption on the frontend team: write the docs coding agents work from and teach developers to code with AI.
- Built Quoth, an MCP server over our GraphQL and Java endpoints that lets any of our 30 developers trace data end to end, like why a price isn't showing on a product.
- Own the GA4 data layer and reporting pipeline since our move from Adobe. When reporting breaks, it comes to me.
- Traced bad analytics data to a tracking bug in the Express iOS app and shipped the Swift fix through the iOS team's review, using AI to work in an unfamiliar codebase.
- Co-maintain pure-react-carousel as one of four npm maintainers: about 67k weekly downloads and 1.7k GitHub stars.
- Write tests first where I can, in a codebase that requires 100% coverage in CI.
- Serve on the production on-call rotation through peak traffic like Black Friday: troubleshoot live issues with Google Cloud and TrackJS, lead incident response and write postmortems.

June 2021 – Dec 2025 — **Ecommerce UI Engineer**, *Express*, Columbus, Ohio

- Led five contract developers through a summer-long move from Unbxd to Google Retail Search: wrote the tickets, ran the meetings, reviewed the code and wired the storefront to the new API through GraphQL.
- Made search understand attributes like color, so "red shirts" returns red shirts instead of every shirt that comes in red. The project earned my promotion to senior.

July 2017 – March 2021 — **Customer Service Representative**, *Spectrum*, Zanesville, Ohio

- Solved high-volume support issues on the first call for non-technical customers.

Projects

Odin, Claude Code Skill

Grew from a context-engineering experiment into a plan-to-PR pipeline for Claude Code with human approval gates. After each task, a look-back step proposes fixes to the skills and rules the agent follows, so the same mistake doesn't happen twice.
Claude Code, Python
github.com/Conor-Hinchee/odin

heap-analyzer

Finds memory leaks in Node.js apps by diffing heap snapshots. Built on Facebook's memlab and published on npm.
Node.js, TypeScript, memlab
