Profile

Senior software engineer with 5+ years building ecommerce applications in React, GraphQL and TypeScript, and analytics pipelines in GA4 and tag management. Leads search and AI adoption on the frontend team at Express, a storefront with about 5 million monthly users. Builds AI developer tooling that catches what coding agents miss.

Skills

Frontend	React, TypeScript, Tailwind CSS, Vite, Webpack, Storybook
Backend & API	Node.js, GraphQL, Apollo Server, Apollo Client, Express.js, GCP Cloud Functions, Firebase, Supabase, CommerceTools API
Testing & Ops	Jest, React Testing Library, Playwright, GA4, TrackJS, Google Cloud Logging
Tools & AI	Git, GitHub Actions, Docker, Claude Code skills, MCP servers, Anthropic SDK

Work Experience

June 2021 – Present
Senior Ecommerce UI Engineer (promoted Dec 2025), *Express*, Columbus, Ohio

- Led five developers moving search to Google Retail Search, replacing keyword matching with ML-ranked results to improve relevance and conversion.
- Lead AI adoption on the frontend team: write the docs and harnesses coding agents work from, build internal MCP servers that help engineers find answers faster, and mentor developers on coding with AI.
- Traced bad analytics data to a tracking bug in the Express iOS app and shipped the Swift fix through the iOS team's review, using AI to work in an unfamiliar codebase.
- Co-maintain pure-react-carousel (express-labs) as one of four npm maintainers, about 67k weekly downloads and 1.7k GitHub stars. Triage issues, review community PRs and publish releases.
- Keep the storefront's React app and GraphQL server at a CI-enforced 100% test coverage threshold.
- Serve on the production on-call rotation: troubleshoot issues in real time with Google Cloud and TrackJS, lead incident response and write postmortems.

July 2017 – March 2021
Customer Service Representative, *Spectrum*, Zanesville, Ohio

- Solved high-volume support issues on the first call for non-technical customers.

Projects

Odin, Claude Code Skill
A Claude Code skill that catches what coding agents miss, like tests that fail silently or code that ignores the project's docs. After each task it proposes fixes to the harness (the skills, rules and scripts the agent follows) so the same mistake doesn't happen twice, with human approval gates between plan, build and sign-off.
Claude Code, Python
github.com/Conor-Hinchee/odin

heap-analyzer
Finds memory leaks in Node.js apps by diffing heap snapshots. Built on Facebook's memlab and published on npm.
Node.js, TypeScript, memlab
github.com/Conor-Hinchee/heap-analyzer

Education

High School Diploma, *Clovis High School*, Clovis, NM
