Work Experience

June 2021 – Present
Senior Ecommerce UI Engineer (promoted Dec 2025), *Express*, Columbus, Ohio

- Led five developers moving search to Google Retail Search, replacing keyword matching with ML-ranked results and raising search-to-purchase conversion.
- Rebuilt the storefront product carousel from scratch with fewer re-renders, improving Core Web Vitals across the site.
- Co-maintained pure-react-carousel (express-labs) as one of four npm maintainers, about 67k weekly downloads and 1.7k GitHub stars. Triaged issues, reviewed community PRs and published releases.
- Maintained 100% test coverage using React Testing Library and Jest.
- Mentored junior engineers through code review and pairing.
- Covered on-call rotations, troubleshooting production issues in real time with Google Cloud and TrackJS, leading incident response and writing postmortems.

July 2017 – March 2021
Customer Service Representative, *Spectrum*, Zanesville, Ohio

- Solved high-volume support issues on the first call for non-technical customers.

Projects

Odin, Claude Code Skill
A Claude Code skill that runs a coding task through plan, execute, review and sign-off, with a human approval gate between each step. A local dashboard shows a live diff with a written rationale. Anything that took more than one pass becomes a proposed fix to the skill's own rules.

heap-analyzer
A CLI wrapper around Facebook's memlab that finds memory leaks in Node.js apps. It diffs three heap snapshots and traces what keeps each leaked object alive.
